

HOMEBOUND INSTRUCTION

Where possible, homebound instruction will be provided to students of Laramie County School District No. 2 who meet the following conditions:

- A. The nature of an illness or injury will cause the student to be absent from school more than one week.
- B. A practicing physician recommends absenteeism from school for each period of illness or injury as part of the prescription.
- C. Parents or guardians of the student make proper arrangements with the building principal for homebound instruction.

The amount and type of homebound instruction will be determined by the Building Intervention or 504 team after a consultation with parents and the homebound teacher.
